

Mobile Informer Work Management

The Only Fully Native Mobile Solution that Makes Work Management Easy!

Benefits

- Extends the perimeter of your Maximo Solution by providing a tailored user interface based on needs.
- Native mobile work management app that provides seamless online/offline functionality powered by the Mobile Informer platform.
- Installs quickly for immediate gains in productivity.
- No middleware servers or software means increased compliance and reduced vulnerability risks.
- Simple user interface designed specifically for Maximo Work Management tasks encourages 100% user acceptance.
- Robust feature set includes attaching docs, map views and touch ID authentication.
- Supports multi-language Maximo implementations.
- Meets existing NIST and DoDAF Security requirements up to and including multi-factor authentication.
- Compatible with many enterprise Mobile Device Management (MDM) tools, including AirWatch, MobileIron, and Citrix XenMobile.
- Basic built-in MDM capabilities

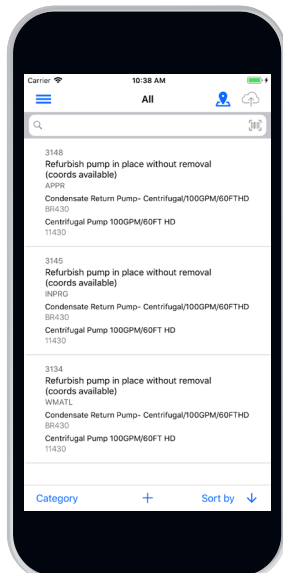

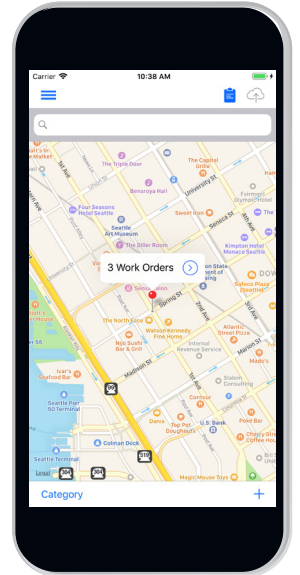

As more and more mobile devices are present in the workplace, mobile work management tools are no longer an option for most maintenance shops – they're a necessity. From delivering productivity gains to improving data quality to simplifying regulatory compliance, the move to mobility makes sound business sense.

The only question that remains is precisely what Maximo tools need to be delivered to your users, when and how? This delivery precision is exactly what sets Mobile Informer apart from and leagues ahead of other mobility option for Maximo.

- Seamless and transparent transitions between offline/online usage.
- No need for middleware servers or additional software, which can complicate security compliance and create additional risk exposure.

- Native applications that provide fast, responsive performance while making full use of device capabilities, including touch ID authentication, cameras, location-based services and more.

Mobile Informer Work Management (InformerWM) gives you all this and more, including support for multi-factor authentication, like PIV-CAC and RSA tokens.

Feature List

- View work orders on a map
- View and search work orders
- Quick filters for work order list
- View work order details
- Issue materials to a work order
- Record labor hours
- Record failure information

Mobile Work Management that Works

InformerWM is simple, turn-key Mobile Work Management app that is completely integrated with Maximo and powered by the Mobile Informer platform. InformerWM was designed from the ground up specifically to manage and execute IBM Maximo Work Orders.

Featuring a wide range of features, from map views of work orders to fingerprint recognition identification for security, InformerWM will get your maintenance workers up and running quickly – enabling them to be more productive than ever before.

100% User Acceptance

Mobility promises improved productivity and increased ROI, but those gains will not be fully realized until your maintenance workers use and embrace your mobile solution. Mobile Informer apps are native apps, meaning that they provide all of the native features that your users are already familiar with – enhancing the user experience and ultimately driving the highest level of user adoption.

InformerWM is designed to provide engagement, adoption, retention and task success, meaning that users are able to focus on their work, rather than learning how to navigate a new tool. In fact, many Mobile Informer users are unaware that they are interacting with Maximo at all!

Powered by Mobile Informer Platform

Installed as a Maximo application, the Mobile Informer platform can deliver 100% user adoption and fast ROI. Other benefits of the Mobile Informer platform include:

- Administration performed within Maximo, including user and device management.
- Applications available for iOS, Android, Windows UWP platforms.
- Affords the highest security, supporting multi-factor authentication.
- Employs IBM best practices, including the use of Maximo Integration Framework (MIF) web services and Maximo Business Objects (MBOs).
- Compatible with all currently-supported versions of IBM Maximo.
